

**Get Connected To Comfort.**

# Prestige – Comfort Like You’ve Never Experienced

At Honeywell, we understand the full and enriched lives that our customers lead. And even when your day-to-day activities may seem to get a little hectic, sacrificing comfort – or control – isn’t an option. Honeywell’s Prestige Comfort Systems and accessories help you achieve a higher level of control while staying connected to what matters most.

## The Brains

Prestige Comfort Systems have Honeywell RedLINK™ technology inside - giving you endless possibilities for controlling and monitoring comfort inside your home with our lifestyle enhancements like the Portable Comfort Control, wireless indoor sensor, wireless outdoor air sensor, wireless humidity control and Total Connect Comfort Services.

## Totally Connected.

Honeywell’s Total Connect Comfort Services give you access to remotely monitor and manage your heating and cooling system – at anytime, from anywhere – through your PC, smart phone or tablet device<sup>1</sup>. Total Connect is supported by the exclusive RedLINK wireless technology from Honeywell. Once installed by your heating and cooling professional, simply go online to register your account and customize your system and alert settings.

<sup>1</sup>Free apps are available for Apple iPhone, iPad and iPod touch devices at time of release. Check [www.mytotalconnect.com](http://www.mytotalconnect.com) for more mobile applications coming soon.

## Prestige 2.0

- **Interview-based programming** — Prestige asks you questions like “what time does the first person wake up in the morning?” and then programs itself based on your answers
- **On-screen HELP button** — the on-board user’s manual gives you definitions and directions for every screen to ensure you are comfortable in your decision making
- **Time-of-Use Scheduling** — automatically adjusts your home’s temperature when utility prices are at their highest to help you save on energy costs
- **All-In-One Control** — controls temperature and Indoor Air Quality (IAQ products) such as humidification, dehumidification and air filtration all from a single control in the living space
- **Diagnostics and Alerts** — with the engineered excellence of Prestige IAQ 2.0 you can now be alerted when your system is not operating as expected giving you time to resolve the issue prior to a loss of heating or cooling

- **Service Reminders** — use your thermostat to remind you when it is time to change your filter, call for a Fall Service checkup or before your warranty expires
- **Precise Temperature Control** — Honeywell thermostats are tested to +/-1 °F for reliable, consistent comfort

## More RedLINK Comfort Accessories

### Wireless Indoor Air Sensor

When paired with a Prestige 2.0 thermostat, the Wireless Indoor Air Sensor(s) gives you the ability to change the sensing location of your thermostat, average temperature in large rooms for more even comfort control or monitor temperature and humidity in separate spaces to provide additional comfort or protection.

### Wireless Outdoor Air Sensor

The Wireless Outdoor Air Sensor sends a signal to each RedLINK-enabled control, which displays both the outdoor temperature and the humidity right on the screen. Use this information to better prepare for your day and to make decisions about when to run your heating and cooling.

### Portable Comfort Control (PCC)

The PCC gives you the freedom to sense temperature and make adjustments from anywhere in your home. With zoning, the Portable Comfort Control can be used to change the set temperature in any zone, from anywhere.

# Total Home Comfort

Comfort is more than just temperature. Honeywell's TrueHOME comfort solutions are about maintaining the right amount of temperature, humidity, and clean, fresh air throughout every room in your home. Be sure to ask your contractor about how to improve your Prestige Comfort System with whole-house indoor air quality enhancements.
